Senior Cyber Security Engineer 📍 Hyderabad, Telangana, India 📞 +91 98765 43210 | ✉️ alex.johnson@email.com 🔗 [linkedin.com/in/alexjohnson](https://www.linkedin.com/in/alexjohnson) | 🐙 github.com/alexjohnson | 🌐 alexjohnson.dev

PROFESSIONAL SUMMARY

Dedicated Senior Cyber Security Engineer with over 8 years of experience in designing, implementing, and managing robust security architectures for enterprise environments. Expertise in threat hunting, incident response, and DevSecOps integrations across AWS and hybrid infrastructures. Proven track record of reducing mean time to detect (MTTD) and mean time to respond (MTTR) by over 40% through automation and advanced SIEM deployments. Adept at leading cross-functional teams to achieve compliance with ISO 27001 and NIST frameworks while fostering a security-first organizational culture.

TECHNICAL SKILLS

- **Core Security Domains:** Threat Hunting, Incident Response, Penetration Testing, Vulnerability Management, Zero Trust Architecture (ZTA), IAM
- **Frameworks & Standards:** MITRE ATT&CK, NIST CSF, ISO 27001, OWASP Top 10, GDPR, PCI-DSS
- **Tools & Platforms:** Splunk Enterprise Security, CrowdStrike Falcon, Palo Alto Firewalls, Wireshark, Burp Suite Professional, Tenable Nessus, Metasploit
- **Cloud / DevSecOps:** AWS Security Hub, Azure Security Center, Kubernetes Security, Docker, GitLab CI/CD (SAST/DAST integration), Terraform
- **Programming & Scripting:** Python, Bash, PowerShell, SQL

WORK EXPERIENCE

Lead Cyber Security Engineer *SecureTech Global | Hyderabad, India | Jan 2021 – Present*

- Architected and deployed a centralized SIEM solution (Splunk) processing 5TB+ of log data daily, improving threat visibility across hybrid cloud environments.
- Developed automated incident response playbooks using Python and SOAR platforms, reducing Mean Time to Respond (MTTR) by 45% for critical alerts.
- Spearheaded the implementation of a Zero Trust Network Access (ZTNA) model using Okta and Palo Alto Networks, effectively eliminating lateral movement risks.
- Integrated SAST/DAST and software composition analysis (SCA) tools into the CI/CD pipeline, reducing production vulnerabilities by 60%.
- Led a 24/7 Security Operations Center (SOC) team of 6 analysts, conducting regular tabletop exercises and advanced threat hunting operations.

Cyber Security Analyst *DefendNet Solutions | Pune, India | Jun 2018 – Dec 2020*

- Executed comprehensive network and web application penetration tests, identifying and remediating over 200 critical and high-severity vulnerabilities.

- Managed endpoint detection and response (EDR) utilizing CrowdStrike Falcon for a fleet of 10,000+ endpoints, successfully isolating 3 major malware outbreaks with zero data loss.
- Conducted rigorous vendor risk assessments and internal security audits to ensure continuous compliance with ISO 27001 and PCI-DSS standards.
- Designed and delivered organization-wide security awareness training, reducing successful phishing simulation clicks by 35% within the first year.

Information Security Associate *GlobalTech Systems | Bengaluru, India | Jul 2015 – May 2018*

- Monitored network traffic using Intrusion Detection/Prevention Systems (IDS/IPS) and responded to Tier 1 and Tier 2 security incidents.
- Configured and maintained next-generation firewalls (NGFW) and VPN gateways, ensuring secure remote access for 2,000+ employees.
- Automated routine security log analysis using custom Bash scripts, saving the team approximately 15 hours of manual work per week.

PROJECTS

Automated Threat Intelligence Platform

- *Tech Stack:* Python, Splunk REST API, AWS Lambda, MISP
- *Problem Solved:* Security analysts were spending excessive time manually correlating threat feeds with internal logs.
- *Features Implemented:* Built a serverless pipeline to aggregate IOCs from MISP, enrich them using VirusTotal APIs, and auto-update SIEM blocklists.
- *Results/Impact:* Saved 25 hours per week in manual correlation and improved the detection rate of zero-day indicators by 30%.

Cloud Security Posture Management (CSPM) Rollout

- *Tech Stack:* AWS Security Hub, AWS Config, Terraform, Python
- *Problem Solved:* Lack of centralized visibility into misconfigurations across 50+ AWS accounts.
- *Features Implemented:* Deployed custom AWS Config rules via Terraform to continuously monitor and automatically remediate publicly exposed S3 buckets and open security groups.
- *Results/Impact:* Achieved 99% compliance with AWS Foundational Security Best Practices within 3 months of deployment.

ACHIEVEMENTS

- **"Security Guardian of the Year" (2022):** Recognized at SecureTech Global for successfully identifying and containing an advanced persistent threat (APT) actor within 2 hours of initial compromise.
- **Top 5% on HackerOne:** Actively participate in bug bounty programs, having responsibly disclosed over 40 valid security vulnerabilities to major tech companies.
- **Capture The Flag (CTF) Finalist:** Secured 3rd place overall in the National Cyber Security Hackathon (2020) out of 500+ competing teams.

CERTIFICATIONS

- **CISSP (Certified Information Systems Security Professional) | ISC2 | 2022**

- **AWS Certified Security – Specialty** | Amazon Web Services | 2021
- **CEH (Certified Ethical Hacker) v11** | EC-Council | 2019

EDUCATION

Bachelor of Technology in Computer Science and Engineering *National Institute of Technology (NIT), Warangal* | 2011 – 2015

- CGPA: 8.8/10 (First Class with Distinction)

LEADERSHIP & EXTRACURRICULAR

- **Conference Speaker:** Delivered a talk on "Automating Incident Response in AWS" at the nullcon Cyber Security Conference (2023).
- **Open Source Contributor:** Contributor to the OWASP ModSecurity Core Rule Set (CRS) project, adding robust rules for modern web exploits.
- **Security Mentor:** Volunteer mentor for Women in CyberSecurity (WiCyS), guiding junior professionals on career paths and certification strategies.
