CORE SKILLS

PROFICIENCY

CERTIFICATIONS

- 💎 AWS Solutions Architect Pro
- 💎 Certified Kubernetes Admin (CKA)
- 💎 Google Cloud Professional

LANGUAGES

English	Native
Mandarin	Fluent
Japanese	Basic

Professional Summary

Results-driven Senior Software Engineer with 12+ years designing and delivering scalable distributed systems serving 100M+ users. Deep expertise in cloud-native architectures, microservices, and platform engineering. Led cross-functional teams at Google and Stripe, reducing infrastructure costs by 40% while improving P99 latency. Passionate about developer experience and building systems that scale effortlessly.

Professional Experience

Staff Software Engineer

Jan 2021 - Present

Stripe, Inc. · San Francisco, CA

- ▶ Architected and led development of Stripe's next-gen payment processing engine handling \$850B+ annual transaction volume with 99.999% uptime SLA
- ▶ Designed event-driven microservices platform using Kafka + Go reducing fraud detection latency from 340ms to 28ms (91% improvement)
- ▶ Built internal developer platform adopted by 1,200+ engineers, reducing service deployment time from 3 hours to 8 minutes
- ▶ Led team of 9 engineers through zero-downtime migration of 47 legacy services to Kubernetes on GKE, saving \$2.8M annually
- ▶ Implemented ML-powered anomaly detection pipeline processing 4M events/second using Python + Apache Flink

Senior Software Engineer, Infrastructure

Mar 2018 - Dec 2020

Google LLC · Mountain View, CA

- ▶ Core contributor to Google Cloud Spanner's distributed transaction system, co-authoring 2 internal patents on cross-region consistency protocols
- ▶ Designed and shipped observability platform used across 200+ Google teams, integrating distributed tracing with SLO monitoring
- ▶ Reduced Bigtable read latency by 35% through novel cache-aside pattern leveraging Redis and consistent hashing
- ▶ Mentored 6 junior engineers through Google's internal L3→L4 promotion process; 5 received successful promotions

Software Engineer II

Jun 2015 - Feb 2018

LinkedIn Corporation · Sunnyvale, CA

- ▶ Rebuilt LinkedIn's real-time notification pipeline handling 1.5B+ daily notifications using Java + Apache Kafka
- ▶ Led A/B testing infrastructure project enabling 400+ concurrent experiments across mobile and web platforms
- ▶ Contributed to open-source Kafka ecosystem tools with 3,400+ GitHub stars

Software Engineer

Aug 2012 - May 2015

Amazon Web Services · Seattle, WA

- ▶ Developed key features for Amazon DynamoDB's auto-scaling system managing 10,000+ customer tables
- ▶ Built internal capacity planning tooling reducing over-provisioning costs by \$12M across the org

Education

B.S. Computer Science, Minor in Mathematics

University of California, Berkeley

2012 · GPA 3.94 · Phi Beta Kappa · Dean's List (8 semesters)
