PROFESSIONAL SUMMARY

Visionary CTO and engineering executive with 17+ years building and scaling technology organizations in financial services, fintech, and enterprise software. Track record leading 200+ engineer organizations at Goldman Sachs, J.P. Morgan, and two unicorn-stage startups. Deep expertise in high-frequency trading systems, distributed financial infrastructure, microservices architecture, and building engineering cultures of excellence. P&L responsibility up to \$140M. Led 4 platform modernizations serving 500M+ customers. MBA from Wharton; Computer Science from MIT.

WORK EXPERIENCE

Chief Technology Officer **Goldman Sachs** · New York, NY **Apr 2020 - Present**

- ▶ Lead 240-person engineering organization across trading systems, risk infrastructure, and developer platforms; \$140M annual technology budget
- ▶ Architected Goldman's next-generation algorithmic trading platform processing \$1.2T in daily volume with sub-100µs order execution latency
- ▶ Led 3-year cloud migration from on-premise to AWS/GCP hybrid; reduced infrastructure TCO by \$42M annually while improving reliability to 99.999%
- ▶ Built Goldman Sachs Developer Platform (GSDP) — internal PaaS adopted by 8,000+ engineers; reduced time-to-market for new financial products by 60%
- ▶ Designed real-time risk calculation engine processing 40M+ positions simultaneously across asset classes; replaced legacy batch system running 12-hour cycles
- ▶ Grew engineering headcount from 140 to 240; established hiring bar, career ladders, and technical excellence programs that reduced attrition from 28% to 9%

Stack: AWS, GCP, Kubernetes, Java, Python, Apache Kafka, Apache Flink, Redis, Cassandra, PostgreSQL

VP Engineering, Markets Technology **J.P. Morgan Chase** · New York, NY **Feb 2016 - Mar 2020**

- ▶ Oversaw 120-person engineering team developing fixed income and derivatives trading systems processing \$800B+ daily notional
- ▶ Delivered JPMC's first cloud-native trading desk infrastructure; migrated 45 legacy C++ trading applications to Java microservices on Kubernetes
- ▶ Built ML-powered market-making algorithm increasing desk P&L by \$180M/year through better spread optimization
- ▶ Led regulatory technology program delivering MiFID II and FRTB compliance tools, avoiding \$280M in potential regulatory penalties

Stack: Java, C++, Python, Kubernetes, Kafka, Oracle, FIX Protocol, AWS

Director of Engineering **Stripe, Inc.** · San Francisco, CA **Jun 2013 - Jan 2016**

- ▶ Early engineering leader at Stripe (Series B, 180 engineers); built and led Payments Infrastructure team of 28 engineers
- ▶ Designed Stripe's dispute resolution platform handling 2M+ chargeback cases annually; reduced dispute loss rate by 22%
- ▶ Architected multi-region active-active database architecture for Stripe's core ledger; achieved 99.999% availability

Stack: Ruby, Go, MySQL, MongoDB, AWS, Redis

Senior Software Engineer **Palantir Technologies** · Palo Alto, CA **Aug 2008 - May 2013**

- ▶ Founding member of Palantir's Financial Fraud Analytics team; built graph analytics platform used by 4 major US banks to detect \$2.8B in fraud annually
- ▶ Developed distributed data integration pipeline processing 80TB daily financial transaction data from 150+ source systems

Stack: Java, Python, PostgreSQL, Hadoop, Spark

KEY PROJECTS

TOGAF 9.2 Certified (2019) PMP – Project Management (2015) Series 7 & Series 63 Licensed	Goldman Algorithmic Trading Platform 2021–2023 Ground-up redesign of Goldman's equities algo-trading infrastructure. Sub-100μs execution, 99.999% uptime, \$1.2T daily volume. Won Goldman Sachs Engineering Excellence Award 2023.																																																																		
	JPMC Cloud Trading Desk 2018–2020 First cloud-native trading infrastructure at J.P. Morgan. Migrated 45 legacy systems, reduced latency 40%, saved \$28M/year in hardware costs.																																																																		
	Stripe Dispute Resolution Engine 2014–2016 ML-powered chargeback management system. Processed 2M+/year cases, 22% reduction in dispute losses, integrated with Visa/Mastercard dispute APIs.																																																																		
EDUCATION	PUBLICATIONS, TALKS & MEDIA																																																																		
MBA, Finance & Operations The Wharton School, UPenn Year: 2008 Palmer Scholar (Top 5%)	► 'Scaling Financial Systems: A CTO's Playbook' – O'Reilly, 2023																																																																		
	► Speaker: AWS re:Invent 2022, 2023 – Financial Services Track																																																																		
	► Forbes Technology Council – Monthly Contributor																																																																		
B.S., Computer Science & Mathematics MIT Year: 2005 Phi Beta Kappa · GPA 4.0	► MIT Technology Review Expert Panelist (2021–Present)
