

VIKRAM NAIR

Cloud & DevOps Architect | 10+ Years Experience

(646) 555-0287 | vikram.nair@techmail.com | linkedin.com/in/vikramnair | github.com/vikramnair |
Austin, TX

PROFESSIONAL SUMMARY

Results-driven Cloud & DevOps Architect with 10+ years of experience designing, automating, and scaling enterprise-grade cloud-native platforms across AWS, Azure, and GCP. Proven track record in building zero-downtime CI/CD pipelines, Kubernetes-native microservices architectures, and SRE frameworks delivering 99.99% uptime. Deep expertise in Platform Engineering, FinOps, and ML/AI deployment pipelines for Fortune 500 organizations across fintech, healthcare, and e-commerce industries.

TECHNICAL SKILLS

Cloud Platforms: AWS (EKS, Lambda, RDS, CloudFront, IAM, VPC), Azure (AKS, APIM, Cosmos DB, AD), GCP (GKE, Cloud Run, Spanner, BigQuery)

DevOps & CI/CD: Jenkins, GitHub Actions, GitLab CI, ArgoCD, Spinnaker, Flux CD, Tekton, CircleCI

Container & Orchestration: Docker, Kubernetes (EKS/AKS/GKE), Helm, Istio, Linkerd, Envoy Proxy, Karpenter

Infrastructure as Code: Terraform, Pulumi, AWS CDK, Ansible, Chef, Puppet, AWS CloudFormation, Bicep

Programming: Python, Go, Bash, TypeScript, Java, HCL, YAML, PowerShell

Observability & Monitoring: Prometheus, Grafana, Datadog, New Relic, ELK Stack, Jaeger, OpenTelemetry, PagerDuty

Databases: PostgreSQL, MySQL, MongoDB, Redis, Cassandra, DynamoDB, Cosmos DB, CockroachDB

Security & Compliance: HashiCorp Vault, OPA/Rego, Falco, AWS Security Hub, SAST/DAST, SOC2, PCI-DSS, ISO 27001

ML/AI Ops: MLflow, Kubeflow, Seldon Core, BentoML, Ray Serve, Apache Airflow, Vertex AI, SageMaker

Networking: Service Mesh, API Gateway, Load Balancers, CDN, VPN, DNS, BGP, Zero Trust Architecture

PROFESSIONAL EXPERIENCE

1. PRINCIPAL CLOUD & DEVOPS ARCHITECT

Stripe, Inc. | Austin, TX (Remote) | January 2022 – Present

- Architected **multi-region active-active Kubernetes platform** on AWS EKS serving **40M+ daily API transactions** with 99.99% SLA across 12 availability zones.
- Built **GitOps-based CI/CD platform** using **ArgoCD, GitHub Actions, Helm**, reducing deployment lead time from 3 days to 45 minutes with automated rollback for 100% of services.
- Led **FinOps initiative** using **Kubecost, AWS Cost Explorer, Spot Instances**, saving **\$4.2M annually** through workload right-sizing, reserved instances, and auto-scaling optimization.
- Designed **Zero-Trust security architecture** using **HashiCorp Vault, OPA, AWS IAM Identity Center**, achieving SOC 2 Type II and PCI-DSS compliance across all microservices.

- Implemented **Istio service mesh** enabling mTLS, traffic shaping, canary deployments, and distributed tracing across 200+ microservices in production environments.
- Developed **SRE framework** with **Prometheus, Grafana, PagerDuty**, establishing SLOs/SLIs, automated runbooks, and chaos engineering using **Litmus Chaos**.
- Deployed **ML inference platform** using **Seldon Core, KubeFlow, Ray Serve** on Kubernetes, reducing model deployment time from 2 weeks to under 4 hours.
- Mentored team of **12 senior engineers**, instituted blameless postmortems, architecture review boards, and internal developer portal using **Backstage**.

Technologies: AWS EKS, ArgoCD, Helm, Istio, Terraform, GitHub Actions, Prometheus, Grafana, Vault, OPA, KubeCost, Seldon, KubeFlow, Python, Go, Datadog

2.SENIOR DEVOPS PLATFORM ENGINEER

Atlassian | San Francisco, CA | *March 2019 – December 2021*

- Built **self-service Internal Developer Platform** using **Backstage + Terraform + AWS**, enabling 300+ engineers to provision production-ready cloud resources in under 10 minutes.
- Designed **multi-cloud Kubernetes federation** spanning AWS EKS, Azure AKS, and GCP GKE using **Anthos + Rancher**, ensuring workload portability and disaster recovery.
- Implemented **progressive delivery pipeline** with **Spinnaker + Argo Rollouts**, enabling blue/green and canary releases with automated metric-based promotion gates.
- Reduced infrastructure provisioning time by **85%** through reusable **Terraform modules + Pulumi** components shared via private module registry across 8 product teams.
- Established **observability stack** using **OpenTelemetry, Jaeger, ELK Stack, Grafana**, providing end-to-end distributed tracing for 150+ services across hybrid cloud.
- Deployed **Kafka-based event streaming infrastructure** on Confluent Cloud for real-time feature flagging and audit logging across Jira, Confluence, and Trello platforms.

Technologies: AWS EKS, Azure AKS, GCP GKE, Anthos, Spinnaker, Argo Rollouts, Terraform, Pulumi, Backstage, OpenTelemetry, Jaeger, ELK, Kafka, Confluent, Python, Go, Grafana

3.SENIOR CLOUD INFRASTRUCTURE ENGINEER

Capital One Financial | McLean, VA | *June 2016 – February 2019*

- Led **AWS cloud migration** of 120+ legacy on-premises applications using **ECS Fargate, Lambda, API Gateway, Aurora RDS**, eliminating 4 data centers and reducing infra cost by 42%.
- Built **enterprise CI/CD pipelines** using **Jenkins, GitLab CI, AWS CodePipeline** with SAST/DAST security gates via **SonarQube, Snyk, OWASP ZAP** integrated into every deployment.
- Designed **event-driven serverless platform** using **AWS Lambda, Step Functions, SQS, EventBridge**, processing 5M+ financial transactions daily with sub-100ms latency.
- Implemented **Chaos Engineering program** using **AWS FIS, Gremlin**, improving system resilience and reducing MTTR from 4 hours to 35 minutes.
- Automated **compliance-as-code** using **AWS Config, CloudTrail, Security Hub**, achieving continuous FedRAMP and SOX audit readiness without manual intervention.

Technologies: AWS Lambda, ECS Fargate, API Gateway, Aurora, DynamoDB, Jenkins, GitLab CI, SonarQube, Snyk, Step Functions, EventBridge, AWS Config, CloudTrail, Python, Terraform

4.AZURE DEVOPS & CLOUD ENGINEER

Microsoft Corporation | Redmond, WA | *August 2014 – May 2016*

- Designed and deployed **Azure Kubernetes Service (AKS)** clusters with **Azure AD, RBAC, Pod Identity**, supporting 50+ internal product teams across Microsoft 365 ecosystem.
- Built **Azure DevOps pipelines** with YAML templates, variable groups, and approval gates for .NET, Java, and Python services deployed to AKS and Azure App Service.

- Implemented **infrastructure automation** using **Bicep, ARM Templates, Ansible**, reducing environment provisioning from 3 days to 2 hours across dev/staging/prod.
- Configured **Azure Monitor, Application Insights, Log Analytics** dashboards tracking availability, performance, and failure rates across 80+ microservices.

Technologies: *Azure AKS, Azure DevOps, Azure Monitor, Application Insights, ARM Templates, Bicep, Ansible, Azure AD, Python, PowerShell, .NET, Java*

5.CLOUD SYSTEMS ENGINEER

Infosys Technologies | Hyderabad, India | May 2013 – July 2014

- Migrated 30+ enterprise applications to **AWS EC2, S3, RDS** using lift-and-shift and replatforming, reducing infrastructure costs by 40% in the first year.
- Developed **Python automation scripts** for provisioning, patching, backup, and monitoring of 200+ Linux/Windows servers using **Boto3, Paramiko, Ansible**.
- Implemented **Nagios + Zabbix** monitoring infrastructure with SMS/email alerting, achieving proactive incident detection and 25% reduction in P1 incidents.

Technologies: *AWS EC2, S3, RDS, Python, Boto3, Ansible, Nagios, Zabbix, Linux, Bash, Jenkins*

CERTIFICATIONS

AWS Certified Solutions Architect – Professional — Amazon Web Services, 2023

Certified Kubernetes Administrator (CKA) — CNCF, 2022

Google Professional Cloud Architect — Google Cloud, 2021

HashiCorp Certified Terraform Associate — HashiCorp, 2020

Azure DevOps Engineer Expert (AZ-400) — Microsoft, 2019

EDUCATION

Master of Science in Computer Science | University of Texas, Austin | 2013

Bachelor of Technology – Information Technology | NIT Trichy, India | 2011
