PROFESSIONAL SUMMARY

Senior Salesforce Change Manager / AWS DevOps & Data Engineer with 10+ years of experience designing, deploying, and supporting enterprise CRM, cloud, and data platforms. Expertise in Salesforce release management, AWS DevOps automation, CI/CD pipelines, and large-scale data integration architectures. Proven track record of delivering secure, scalable, and highly available solutions across Finance, Healthcare, Insurance, and Telecommunications industries. Strong background in managing production releases, automating infrastructure, and supporting mission-critical applications in regulated environments.

CORE COMPETENCIES

- Salesforce Change Management • AWS DevOps Engineering • CI/CD Automation
Salesforce Integrations • Cloud Data Engineering • Infrastructure as Code
ETL & Data Pipelines • Data Governance & Security
Release Management • Production Support • Agile & Scrum Cloud Architecture & Engineering

Blue-Green Deployment Strategy

Capacity Planning

Incident Management

Root Cause Analysis

Problem Management

TECHNICAL SKILLS

Salesforce

Sales Cloud, Service Cloud, Experience Cloud, Salesforce DevOps Center, Change Sets, Data Loader, Salesforce REST API, Bulk API, SOQL, Apex (basic), Reports & Dashboards, Sandbox Strategy

Cloud Architecture:

AWS (EC2, S3, RDS, Aurora, DynamoDB, Redshift, Lambda, Glue, Step Functions, Kinesis, IAM, VPC, Route53, API Gateway, CloudFront)

CI/CD & Automation:

Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, Terraform, CloudFormation, AWS CDK, Docker, Kubernetes, Helm, ArgoCD

Observability:

CloudWatch, Prometheus, Grafana, ELK Stack, OpenSearch, Datadog, New Relic, Splunk

Security & Governance:

IAM, RBAC, SSO, MFA, OAuth, SAML, Secrets Manager, KMS, WAF, Shield, GuardDuty, Inspector, Compliance (SOX, HIPAA, SOC2, PCI-DSS)

Resilience:

Auto Scaling, Blue-Green Deployment, Canary Deployment, Multi-Region DR, Backup & Restore, Chaos Engineering

Scripting:

Python, Bash, PowerShell

CERTIFICATIONS

Salesforce Certified Administrator
Salesforce Certified Platform App Builder
Salesforce Certified DevOps Engineer
Salesforce Certified Data Cloud Consultant
AWS Certified Solutions Architect – Associate
AWS Certified DevOps Engineer – Professional
Microsoft Azure Data Engineer
Snowflake SnowPro Advanced
Databricks Data Engineer Professional
ITIL v4 Foundation (Change & Release Management)

PROFESSIONAL EXPERIENCE

Client: Morgan Stanley – New York, NY

Role: Senior Salesforce Change Manager / AWS DevOps & Data Engineer

Duration: 2022 – Present

- Own the end-to-end Salesforce change management lifecycle including requirement intake, technical impact analysis, risk assessment, change documentation, CAB approvals, release scheduling, deployment execution, and post-release validation across multiple Salesforce orgs
- Define and maintain enterprise Salesforce release calendars coordinating activities between business stakeholders, Salesforce Admins, Developers, QA teams, security teams, and infrastructure teams
- Architect and implement large-scale Salesforce data extraction pipelines using Salesforce REST API, Bulk API, Streaming API, and Platform Events to ingest CRM data into Snowflake and Databricks
- Design and build highly scalable ETL frameworks using AWS Glue, AWS Lambda, Apache Airflow, and DBT to transform Salesforce and downstream system data
- Implement enterprise-grade CI/CD pipelines using Jenkins, GitHub, and Salesforce DevOps Center to automate metadata deployments, validation, and environment promotions
- Develop Infrastructure-as-Code using Terraform and CloudFormation for AWS services supporting Salesforce integrations and analytics platforms
- Manage Salesforce sandbox strategy including sandbox refresh schedules, data masking, anonymization of sensitive data, and test data seeding
- Lead Salesforce org consolidation and CRM data migration programs involving more than 50 million records with minimal business disruption
- Design reconciliation frameworks to validate record counts, field-level accuracy, and referential integrity between Salesforce and target systems
- Enforce Salesforce security standards including role hierarchy, profile design, permission sets, encryption at rest and in transit, and audit logging
- Implement Salesforce data governance policies aligned with SOX controls, internal audit requirements, and enterprise risk management frameworks
- Build and maintain enterprise dashboards using Power BI and Salesforce native analytics to provide executive-level insights
- Configure monitoring and alerting using AWS CloudWatch, Splunk, and custom scripts for Salesforce integration health
- Provide Level-3 production support for Salesforce releases and data pipelines, including incident response, root cause analysis, and permanent remediation
- Collaborate with Salesforce Architects, Developers, QA teams, Product Owners, and Compliance teams on system design and CRM roadmap
- Create and maintain deployment runbooks, rollback strategies, and operational documentation
- Optimize Salesforce API usage by tuning batch sizes, concurrency, and retry strategies
- Implement blue-green deployment strategies for Salesforce integrations to reduce production risk

- Develop custom validation scripts using Python and SQL to ensure data consistency
 - Conduct knowledge transfer sessions and mentoring for junior engineers
-

Client: Humana – Louisville, KY

Role: Salesforce Data Engineer / DevOps Engineer

Duration: 2019 – 2022

- Designed and implemented Salesforce ingestion frameworks using Azure Data Factory and Salesforce APIs to integrate healthcare data
 - Built scalable data pipelines to integrate Salesforce with Azure SQL Database, Azure Data Lake, and Databricks
 - Managed Salesforce release cycles including sandbox refresh, UAT coordination, regression testing, and production deployments
 - Developed Salesforce data quality rules and reconciliation reports between healthcare claims systems and CRM
 - Implemented HIPAA-compliant security controls for Salesforce data including role-based access and encryption
 - Automated Salesforce data synchronization using Python scripts and Salesforce Bulk API
 - Created Salesforce analytics datasets for call center, claims processing, and customer operations
 - Developed Power BI dashboards for healthcare leadership
 - Built CI/CD pipelines using Jenkins and Git for Salesforce metadata deployments
 - Maintained metadata version control strategy
 - Supported Salesforce seasonal upgrades and major CRM enhancements
 - Built logging and monitoring for Salesforce integration pipelines
 - Created automated alerting for data failures
 - Optimized Salesforce queries and reports for performance
 - Designed Salesforce data models aligned with healthcare business processes
 - Coordinated releases with QA and business users
 - Documented Salesforce integration architecture
 - Supported data audits and compliance reviews
-

Client: Great American Insurance – Cincinnati, OH

Role: Salesforce Integration Engineer

Duration: 2017 – 2019

- Designed and implemented Salesforce CRM integrations with Snowflake, AWS, and on-premise insurance systems
 - Built batch and near real-time integration pipelines using Kafka and Apache Spark
 - Developed transformation logic using SQL and PySpark
 - Implemented Salesforce CI/CD deployment processes
 - Automated deployments using Terraform and Jenkins
 - Tuned Salesforce API throughput and performance
 - Built monitoring and alerting for Salesforce integrations
 - Supported Salesforce production releases and emergency hotfix deployments
 - Implemented retry mechanisms and error handling frameworks
 - Developed reconciliation scripts for policy and claims data
 - Optimized Spark jobs for large datasets
 - Created technical architecture diagrams
 - Provided on-call production support
 - Coordinated release activities with business stakeholders
 - Maintained integration documentation
-

Client: AT&T – Dallas, TX

Role: Salesforce Data Engineer

Duration: 2015 – 2016

- Built Salesforce analytics pipelines using Google BigQuery and GCP Dataflow
 - Integrated Salesforce APIs with telecom billing and CRM platforms
 - Designed batch ingestion pipelines
 - Developed automated Salesforce reporting jobs
 - Created dashboards for sales and operations teams
 - Optimized SQL queries and data models
 - Implemented security controls for CRM data
 - Supported production data pipelines
 - Tuned ingestion performance
 - Created error handling and logging mechanisms
 - Coordinated deployments
 - Maintained documentation
-

Client: Zoho – Chennai, India

Role: ETL / CRM Data Engineer

Duration: 2014 – 2015

- Built Salesforce CRM data warehouse ETL pipelines
 - Developed CRM dimensional data models
 - Implemented Informatica workflows
 - Designed incremental data loads
 - Created validation and reconciliation reports
 - Supported CRM analytics users
 - Tuned ETL performance
 - Built scheduling frameworks
 - Created error handling logic
 - Documented data flows
 - Supported upgrades
-

Additional Enterprise Clients (Project-Based)

Walmart

- Salesforce retail analytics pipelines
- AWS DevOps automation
- CI/CD pipeline setup
- Data reconciliation

CVS Health

- Salesforce healthcare CRM integrations
- Data governance implementation
- Security compliance

UnitedHealth Group

- Salesforce CRM reporting
- Data quality frameworks
- Release support

JP Morgan Chase

- Salesforce release management
- DevOps automation
- Risk controls

Verizon

- Streaming CRM pipelines
- Kafka integrations
- Monitoring setup

Comcast

- Salesforce reporting automation
- AWS pipeline orchestration
- Cost optimization

Target

- Salesforce sales analytics
- Data warehouse integration
- Reporting automation

Deloitte

- Salesforce transformation programs
- DevOps enablement
- Governance design

Accenture

- Salesforce org migration
- CI/CD framework design
- Metadata automation

Infosys

- Salesforce integration projects
- Data engineering support
- Deployment automation

CERTIFICATIONS:

AWS Certifications

AWS Certified DevOps Engineer – Professional
AWS Certified Solutions Architect – Professional
AWS Certified Solutions Architect – Associate
AWS Certified SysOps Administrator – Associate
AWS Certified Cloud Practitioner
AWS Certified Security – Specialty
AWS Certified Advanced Networking – Specialty

AWS Certified Machine Learning – Specialty
AWS Certified Data Analytics – Specialty

KEY ENTERPRISE PROGRAMS

- Salesforce CRM Migration – 75M+ records
 - CI/CD Automation – 50% reduction in deployment failures
 - AWS DevOps Platform – zero downtime releases
 - Salesforce Analytics Platform – 2M+ events per day
 - Governance Framework – 65% improvement in data quality
-

KEY PROJECTS

- Salesforce CRM Migration – 50M+ records
 - CI/CD Pipeline Automation – reduced failures by 45%
 - AWS DevOps Platform – zero-downtime deployments
 - Salesforce Analytics Platform – 1M+ events/day
 - Data Governance Framework – improved quality by 60%
-

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering
